

## Maddbz's 'broke boi' t19d4 guide

## Gear

4/4 Skyent (T20)

Exothermic Jacket (T19)

## 64 Bit clover (T17)

**Total Stats:**71,675

**Turnrate: 587,992**

## Runes

2 speed, 1 emp and one DS.

Mull (didn't pull bonik) and Telgu dorito

## Gael Meta rune

## Fam augs and stable

### Ularius (+5)

## Bone: Redirect

**Chip:** ‘X% DR for how many teammates alive’

**Pumps:** 3x Deflect

## Captain Babosun (+5)

**Bone:** 'At full health, SP generation is increased by X%'

**Chip:** 'X% of dmg to enemies under 30% HP'

**Pumps:** 2x Empower, 1 speed pump

(Needs speed pump for more turns)

## Lerky(+0)

**Bone:** 'At full health, SP generation is increased by X%'

**Chip:** 'Skills that cost SP do X% more dmg'

**Pumps:** 3x Empower

## Skills used(Your char):

## Fam skills used

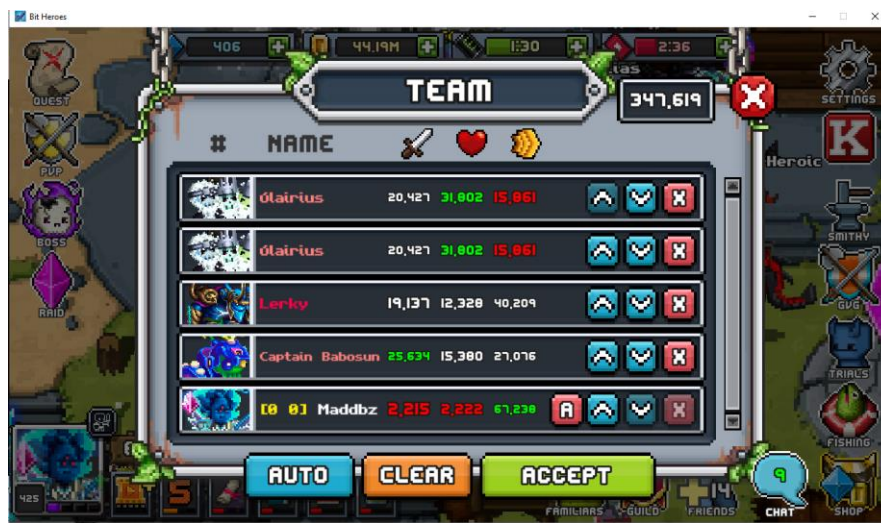

### Lerky:

### Captain Babosun:

## Team:

## Doing the D4

**Mobs:** Generate SP using 'Skymark' and protect yourself with 'Skyent avatar' first and then your ula's and keep on doing so whenever you are hit. Spam Lerky's 0 SP shock until the 2SP target shock skill is ready to be used, use it on dps mobs. Spam Capt Babosun's 0SP target shock as a follow up to lerky's 0SP shock weakest to be able to proc emp. Heal and shield yourself and team on any tank mobs left through the use of 0SP 'windpaler'.

### Augments

Bonuses: 25% Accuracy  
Pumps: 60% Block  
Bone: First ATK has 20% chance of being evaded  
Chip: Below 30% HP, Gain 20% earth resistance  
Brain: 30% ATK strongest when hit

**Roboswa (Turnrate:97,811):** Generate SP using 'Skymark' and protect yourself and your ula's with 'Skyent avatar'. Kill all the dps mobs and stack shock on any nearby tank mobs using Lerky's 0 and 2SP skills and Capt Babosuns 0 and 2SP skills. Do not hit roboswa due to its brain. Pray for ula to deflect bleed on to roboswa. Make sure to alternate and protect ula to prevent them from being oneshot. Prioritize protection on Ula over yourself, especially if its roboswa alone and always have them protected. If u have to hit roboswa, make sure that ula is protected with 'Skyent Avatar' to nullify the brain damage. (Easiest with this strat)

### Augments

Bonuses: 25% Accuracy  
Pumps: 30% Empower  
Bone: First ATK has 30% chance of Empower  
Chip: Elec DMG increased by 20% to enemies below 30% HP  
Brain: 30% ATK strongest when hit

**Washi (Turnrate: 200k):** Generate SP and protect your first ula with ‘Skyent avatar’ and then yourself and then the second one. Keep alternating and protecting the ula’s and try cheese the deflect. Always put the strongest ula up front to avoid using potions. Clear the dps mobs around Washi but do not target washi due to the attack brain, only target him if he already has 2 shock stacks from deflect to be able to proc emp but always have the 2 ula’s protected. If not, always attack the tank mob next to Washi to proc shock.

<u>Augments</u>	
Bonuses:	25% Accuracy
Pumps:	30% Speed
Bone:	Full HP Gain 20% SP
Chip:	12.5% Heal Bonus
Brain:	30% Spread Heal/Shield per turn

**Dr Ediblegh (Turnrate:461,573):** Make sure to almost **ALWAYS** protect yourself against Dr E. Dr E hits weakest and is the fastest boss so brodie will hit you, a lot. Since you are faster than Dr E, you are able to build up SP for ‘Skyent avatar’ and start SP and heal cycling to keep yourself protected and above the 50% health threshold to proc Exothermic Jacket. Try clear the dps mobs around you before Dr E heals them up. Dr E Heals frequently so be ready for a long battle.

Use Lerky’s 2SP ‘shock closest 3’ if there are 3 mobs or more in the battle (Including Dr E) to produce a lot of shock damage when you proc E.M.P or use Lerky’s 2SP ‘shock target X3’ if there are 2 or less mobs in the encounter and directly target Dr E. Also use Capt Babosuns 1 SP ‘shock closest and weakest’ to generate a lot of shock

damage and also his 2SP 'shock furthest enemy X2' as a shock nuke directly at Dr E to kill him. (Hardest boss with this strat)

## Conclusion

Dr Ediblegh was the hardest boss for me due to the lack of damage being put up by my unstabled Lerky and my +5 Capt Babosun but it was possible to beat. Also be careful with roboswa and washi as they have hard hitting atk front skills so that protection needs to be top tier.

This is probably the most 'shambles' clear of this D4 yet as it just used one ancient without any uptiers and some mid fams but it proves its still possible so **GOOD LUCK** on this clear bit hero!
