

## D4 T19 STRATEGY

Theithyus +5 = Pumps Evade / Chip DR Alive / Bone Redirect

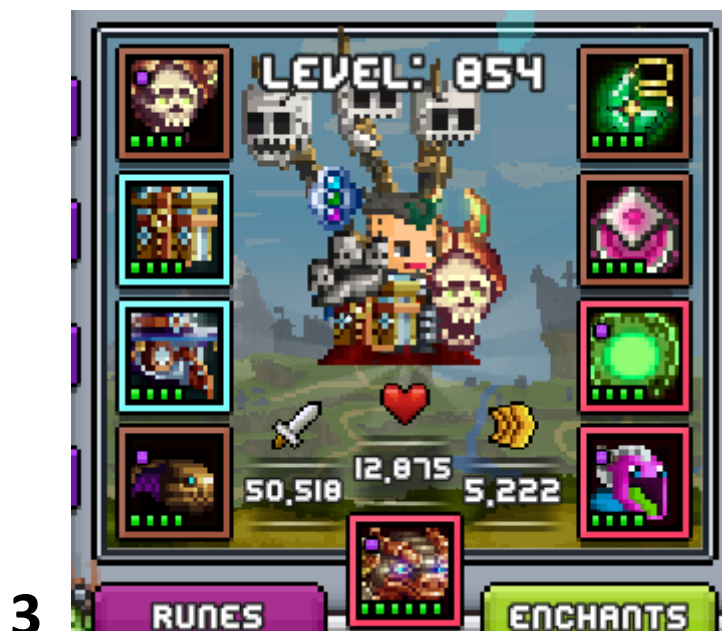

Lerky +5 = Pumps DS and EMP / Chip Sp Inc Dmg / Bone Drain

Lady +4 = Pumps Speed / Chip Heals Shields / Bone Sp Regen

Me = Bait

1

Enchant Full Evade.

Runes Redirect, Elgu and Boli.

The 1 build is for mobs, the main thing is you always leave battle with full shield and life.

The 2 build is for Washi and Dr Ediblegh, you just need to kill him as fast as you can... kill or die, don't worry about heals.

The 3 build is for Robosawa, **THIS IS YOUR PROBLEM**, he will probably kill you or your tanks, your **MOUNT** can save you!!!

# How to do it?

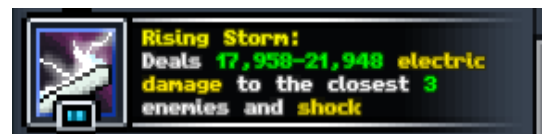

When enter fight with mobs first you want to kill the dangerous familiars...

Use this skill from your Lady

in

your Lerky as fast as you can and then use  
to clean mobs.

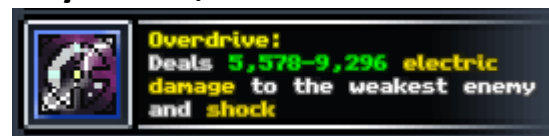

or

is alive,

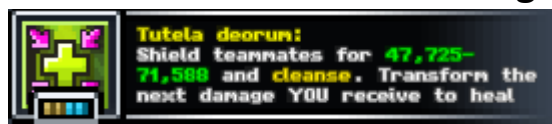

you want to stay in the battle as far as you can, don't use

attacks to do damage and only use

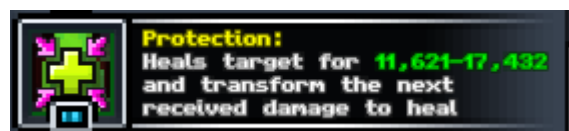

from Lerky, this will do the lowest damage as possible, full

shield with

and

heal team with

from Lady.

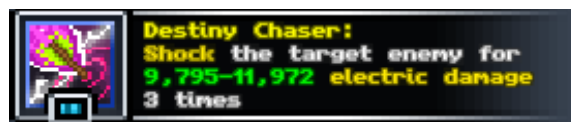

Both easy...

Use this skill from your Lady

in

your Lerky and then use

in the boss until he dies, if not, do it again. Probably you or one tank will die, just revive them.

## THE PROBLEM!!!

You don't want to hit him because of his brain, so if you hit make sure you are doing a lot of damage.

Start with  **Rising Storm:** Deals 17,958-21,948 electric damage to the closest 3 enemies and shock to deal massive

damage aoe, then  **Destiny Chaser:** Shock the target enemy for 9,795-11,972 electric damage 3 times on the familiar next to him, NEVER DIRECT ON HIM, and last

 **Overdrive:** Deals 5,578-9,296 electric damage to the weakest enemy and shock to avoid multiple hit.

This fight you have to stay alive more than you can, so you

need lucky, always use  **Protection:** Heals target for 11,621-17,432 and transform the next received damage to heal to make sure your tanks and you are alive.

The last thing is how you kill him since you can't with Lerky...

Mount the Obliteration skill from your ancient weapon...

You need a Crit and Empower hit... From Ascendancy or Fobbet.

Is not easy, so I recommend you leave him for last.

GOOD LUCKY HAVE FUN! FROM YOUR FRIEND **SIZZ ZISS** s2
